

LAVASOFT

FILE SHREDDER

Take control of the confidential information on your PC!

Digital information is increasingly stored on our computers, leaving the door wide open to security and privacy breaches. Even after you think you have deleted files, they still remain on your computer. When you delete a file, empty your Recycle Bin or format your hard disk, you only alter the structure of the drive, leaving most of the data intact and recoverable.

The easy-to-use Lavasoft File Shredder is a natural addition to the privacy tools you use regularly to ensure your computer security. At home or at the office, Lavasoft File Shredder allows you to permanently remove unwanted files and data in order to give you the control you need over your sensitive information.

Digitally shred home and corporate files for ultimate privacy!!

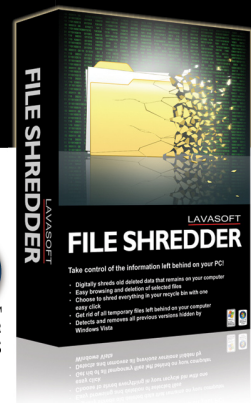

You are in control of your digital information with the ability to destroy old deleted data on your computer with the same certainty as when you shred sensitive papers in a paper shredder.

Never worry about someone else recreating the files you have already deleted by completely removing selected stored information on your hard drive and other memories.

You have the means to document sensitive private files that have been removed, a valuable reporting tool in a business environment.

Easy-to-use interface guides you through the process of shredding free space, to clean your computer from all old deleted files.

Free online customer support, 24-hours a day,
7 days a week

Lavasoft File Shredder Key Features

- Permanently remove any sensitive digital information from your computer such as Word documents, Excel files, PowerPoint files, music files, videos, photos and more.
- Select a file to be shredded with a simple right-click or browse for a file or folder.
- Detect and remove "previous versions" automatically saved and hidden by Windows Vista.
- Shred everything in your recycle bin with one easy click of a button.
- Conveniently shred files by dragging and dropping them into your desktop "shredding bin."
- Shred all your temporary files left behind on your computer.
- Clean up your computing history. Use the "Shred all free space guide" to clean your computer from all old deleted files and folders that are still stored on your drives.
- Document the files that have been permanently removed with a qualitative reporting option.
- Supports the Department of Defence (DoD) shredding algorithm, using seven rounds of overwriting, as well as all other advanced standards.

About Lavasoft's Shredding Technology

Lavasoft File Shredder's shredding technology is based on well known standards and approved algorithms for complete data removal. File Shredder supports the following overwriting algorithms:

- HMG Infosec Standard 5, The Baseline Standard Blowfish, 448 bits
- HMG Infosec Standard 5, The Enhanced Standard
- Peter Gutmann's algorithm
- Bruce Schneier's algorithm
- Navy Staff Office Publication (NAVSO P-5239-26) for RLL
- The National Computer Security Center (NCSC-TG-025)
- Air Force System Security Instruction 5020 (AFSSI-5020)
- US Army AR380-19
- German Standard VSITR
- OPNAVINST 5239.1A
- National Security Agency (NSA/CSS Manual 130-1) – for magnetic storage only.
- U.S. Department of Defense Sanitizing (DoD 5220.22-M ECE)

About Lavasoft AB

- Established in 1999
- Private company
- Headquarters in Gothenburg, Sweden
- 4,000 partners in over 120 countries
- Over 250 million Ad-Aware downloads worldwide

The Lavasoft Mission

The Lavasoft mission is to deliver high quality security software solutions that protect individual computer users and business networks worldwide from compromising and intrusive privacy threats.

The Lavasoft Vision

Our vision is that every computer user, regardless of economic status or geographic location, has the power to control their individual privacy and security. We strive to promote an environment of ethical change in the spyware industry to uphold our ideals of social and corporate consciousness.

"My favorite software of Lavasoft is the File Shredder and its advanced features and many deleting methods to choose from. Especially the interface and the report details were surprising to me. I think the File Shredder is the best deleting software I have come across."
