

LAVASOFT

DIGITAL LOCK

Secure your files against identity theft!

In our digital world, vast amounts of information is stored on our computers, and passed back and forth. Your files, both at home and at the office, are a trove of private and potentially valuable information. Theft of confidential information can result in heavy financial loss - Americans lost an estimated \$49.3 billion US in 2006 to criminals who stole their identities, according to studies. With encryption technology, you can securely store or send files knowing that your private information is safely locked, and will never fall into the wrong hands.

Protect the sensitive documents and private digital data on your computer with the strong encryption technology of Lavasoft Digital Lock. The Digital Lock is a natural addition to the privacy tools you use regularly to ensure your computer security.

Encrypt home and corporate files for safe storage and sending!

Relieve the burden of worrying about identity theft with Lavasoft's strong encryption technology that protects your files and sensitive information.

Browse the web with ease and connect your laptop or desktop computer to other networks, knowing that your files will remain secure.

Use Lavasoft's Digital Lock as an additional measure of control on a computer that already has log-in security, or as an extra back-up if a PC is lost, stolen, or accessed by another person.

Never worry about a third party gaining access to files transmitted by e-mail or external media – when you lock a file or folder, you alone have access to it.

Free online customer support, 24-hours a day, 7 days a week.

Key Features

- ➔ Strong encryption technology including AES 256 Bits
- ➔ Easy-to-use program interface
- ➔ Direct security channel for e-mail
- ➔ Encrypts all file formats for storage or sending
- ➔ Easy browsing and encryption of selected files
- ➔ Shreds original file after encryption

System Requirements

- ➔ Microsoft Windows
 - Windows 2000
 - XP
 - Vista
 - Windows 7 (32 and 64-bit)
- ➔ 15 MB free disk space
- ➔ RAM: Operating system + minimum 10 MB

Available Languages

- ➔ English
- ➔ German
- ➔ Swedish

Lavasoft Digital Lock Key Features

- Secure your files and sensitive data with strong encryption that supports several encryption algorithms, including the new AES standard 256 Bits.
- Conveniently select files for encryption with a simple right-click, drag and drop functionality, or by browsing for a file.
- Create encrypted e-mail attachments that can be sent to recipients that do not have Digital Lock installed - only the correct password is needed to unlock encrypted files.
- Benefit from the Digital Lock's ability for multiple encryption of selected files – encrypt a file more than once and use different combinations of passwords and encryption algorithms for added control.
- Full shredding functionality means you have the opportunity to shred the original file after completing a successful encryption.
- Store and send files the way you choose with an encryptor that supports your security needs and individual way of working.

About Lavasoft's Encryption Technology

The encryption technology used in Lavasoft Digital Lock is based on the following well-known standards and approved encryption algorithms:

- New AES-standard Rijndael, 256 bits
- Blowfish, 448 bits
- Twofish, 256 bits
- SafelT algorithm, 480 bits
- Hash-algorithm: MD5
- Secure your e-mail communication. Right click on any file and choose "encrypt and send to mail" and no one will be able to read the information in the attachment without the correct password.

The following formats are supported:

- .html files with imbedded Java technology. These can be received by anyone anywhere.
- .safe files. Send this format to another Digital Lock user (demo or full version) or any user that download the Free Encryption Reader.
- .exe files. A self executable file that includes the encryption reader right away.
- .zip files. Put the selected format in a zip folder when you need to.

About Lavasoft AB

- ➔ Established in 1999
- ➔ Private company
- ➔ Headquarters in Gothenburg, Sweden
- ➔ 4,000 partners in over 120 countries
- ➔ Over 400 million Ad-Aware downloads worldwide

The Lavasoft Mission

The Lavasoft mission is, as an innovation-driven organization, to pioneer and deliver high quality security solutions that protect individual computer users and business networks worldwide from compromising and intrusive privacy threats.

The Lavasoft Vision

Our vision is that every computer user, regardless of economic status or geographic location, has the power to control their individual privacy and security. We strive to promote an environment of ethical change in the spyware industry to uphold our ideals of social and corporate consciousness.

For the seventh consecutive year, identity theft topped the U.S. Federal Trade Commission's annual report on consumer fraud complaints, accounting for 36 percent of the 674,354 complaints received in 2006.
